

Webinar on “Energy Efficiency in Refrigeration and Air-Conditioning (RAC) service sector practices and Awareness Workshop for non-HCFCs Alternatives”

Hyderabad (Telangana)

28th July 2021 (11:30AM – 2:00PM)

With the increase in number of installed air conditioners, the requirement for servicing of refrigeration and air-conditioning (RAC) equipment is increasing. In recent years, every service technician needs to handle variety of refrigerants like HCFC-22, R-32, R-290, R-410A, etc. The country is phasing out HCFC - 22 refrigerant. Therefore, knowledge of alternative refrigerants is a must.

The Training on good servicing practices and alternative refrigerants is not only essential for safe handling alternatives and but also enhances skills of service technicians along with RAC dealers and other stakeholders.

Benefits of Webinars:

- Usage of good tools and equipment
- Recognition of quality service
- Better personal safety
- Improvement of energy efficiency of RAC equipment through
 - good servicing practices
 - recovery recycling and reclamation and for non-HCFCs alternatives
- Environment Protection
 - Reduced refrigerant leakage
 - Continued energy efficient operation of serviced air conditioner
- Define the Role of RAC dealers, associations etc.

The training programmes are being conducted across the country through webinar mode by
